

Date June 14<sup>th</sup>, 2019

**To:** The Honorable Henry Stern, Chair  
The Honorable Brian Jones, Vice Chair  
Members, Senate Natural Resources and Water Committee

**From:** Rex D. Frazier, President  
Seren Taylor, Senior Legislative Advocate

**Re:** AB 1516 (Friedman) Fire Prevention: Wildfire Risk: Defensible Space and  
Fuels Reduction Management

**PIFC Position: Support if Amended**

The Personal Insurance Federation of California (PIFC) is a statewide trade association that represents five of the nation's largest property and casualty insurance companies (State Farm, Liberty Mutual Insurance, Progressive, Mercury, and Nationwide as well as associate member NAMIC) who write personal lines auto and home insurance in California.

PIFC is pleased to support, if amended, AB 1516 – a measure that will establish requirements for noncombustible zones for homes in high fire hazard areas. It would also authorize the Department of Forestry and Fire Protection (CAL FIRE) to have access to important information on how locals comply with defensible space requirements in very high fire hazard severity zones. The bill additionally increases awareness of proper vegetation management by prohibiting the planting of incompatible trees under powerlines and by authorizing CAL FIRE to provide assistance to local governments.

PIFC has long supported legislation to develop model defensible space programs to promote positive action by homeowners, contractors and local government. Maintaining defensible space is one of the most cost-effective ways to protect a structure from a wildfire and can often be created by the property owner.

Recent amendments (June 11, 2019) to AB 1516 require CAL FIRE to develop a wildland-urban interface wildfire risk model to determine the risk for a community or parcel within certain areas of the state. **We respectfully request an additional amendment to establish an advisory workgroup that includes representatives from insurers and insurance research organizations** with the relevant expertise to participate in development of the new wildfire risk model. We believe we can offer valuable data and experience that will greatly contribute to the effort.

AB 1516 will encourage a greater understanding of wildfire risk and of California's requirements for defensible space around structures, which is beneficial for all of our communities. For this reason, PIFC supports AB 1516 if it is amended as suggested. If you have any questions regarding PIFC's position, please contact Seren Taylor at (916) 442-6646.
