RECEIVED

**\*\*\* Notice of Cancellation of Prenotice Public Discussion \*\*\***

**TO:** Interested and Affected Parties

**DATE:** December 12, 2008

**RE:** Notice of Cancellation of Prenotice Public Discussion on Contemplated Modification to Section 2632.9(e) of Title 10 of the California Code of Regulations to reflect the updated Frequency and Severity Bands Manual.

The Prenotice Public Discussion, regarding Contemplated Modification to Section 2632.9(e) of Title 10 of the California Code of Regulations to reflect the incorporation of the updated California Private Passenger Automobile Claims Frequency and Severity Bands Manual, previously scheduled for December 19, 2008, is hereby cancelled.

To increase public participation and improve the quality of the proposed regulations, we mailed on November 25 an invitation to all interested parties to attend the discussion or to submit comments. We have received no comments or RSVPs. We have concluded that the proposed regulations do not, as the threshold requirement is stated by Cal. Gov. Code section 11346.45(a), "...involve complex proposals or a large number of proposals which cannot easily be reviewed during the comment period."

**ANTICIPATED FORMAL RULEMAKING**

Participation in this now-cancelled prenotice public discussion would have been in addition to, and not in substitution for, participation in any formal rulemaking process that may ensue. The Department anticipates proposing formal adoption of the previously-distributed draft regulation in the near future. Interested members of the public are encouraged to continue any review or analysis of the proposal. Written comments received anytime before the public comment deadline in the formal rulemaking will be included in the record of the rulemaking.

All inquiries regarding this now-cancelled prenotice public discussion should be directed to:
